SCIENCE SHOW

This week we enjoyed another fantastic visit from Adrian and the Travelling Science Show, with exciting hands on sessions for both KS1 and KS2. KS1 explored materials and how they change through folding, heating and twisting, and took part in a brilliant outdoor experiment where a liquid transformed into a gas, fizzing wildly until the lid popped off the tube.

KS2 investigated electricity, creating static charges and discovering how a circuit can travel through them simply by holding hands – they became the circuit themselves! It was a lively, engaging way to bring science to life.
